Today we're proud to publish Top 50 (59) list with the best works from the [Concordia Lighthouse Competition](#). Editor's Choice Awards and Winners will be announced during this and next week on our website and social media pages.

We were overwhelmed by the level of the works that we and the Jury have seen during the Concordia Lighthouse Competition. We couldn't select 50 best works, so here we're actually presenting 9 more works, but we want to underline that these are not all works worth of mentioning. During summer we will publish on our social media pages more works. In general Participants have shown a breathtaking level of creativity and extraordinary approaches in the Lighthouse design. In the Competition Participants were asked to redefine a contemporary lighthouse typology and take into consideration advances in technology, development of sustainable systems and its metaphorical value which has made it one of the most inspiring structures in the world. Lighthouse design should become a tribute to the Costa Concordia Disaster and highlight the vulnerable borders between the elements of Land and Sea, Sky and Ground, Light and Darkness. Even today when global positioning systems diminish the role of the lighthouses, they still play and important role and are inalienable parts of the marine navigation tradition.

All works can be downloaded in HD format.

Feel free to share TOP50 (59)!
